GINA UZUNYAN TO SERVE AS 2016 SRAR PRESIDENT

REALTOR Gina Uzunyan was unanimously affirmed to serve as President of the Southland Regional Association of REALTORS for 2016, it was announced following the first meeting of the 2016 Board of Directors. Uzunyan currently serves as the association's President-Elect.

Uzunyan is well qualified to lead the 9,500 member association, one of the nation's largest. She has a long and distinguished career of service to the real estate industry and the association.

A member since 1989, she is completing her seventh year as a member of the board of directors and second year on the Executive Committee. Her past experience includes vice-chair of the Governmental Affairs Committee, and service on the Education, MLS, Grievance, Ethics and Arbitration Policy, Professional Standards and Young Real Estate Professionals committees. She is a 2007 graduate of the SRAR Leadership Academy.

Active at the state level, Uzunyan has been a director of the California Association of REALTORS since 2011 and has served on the Transaction & Regulatory, Professional Standards, MLS, Taxation & Government Finance, Legislative and Housing Affordability Fund committees

Active in both residential and commercial real estate, Gina holds the national professional designations of CCIM (certified commercial and investment member) and SFR (short sale and foreclosure resource certification). In addition to her real estate broker license, Uzunyan is a licensed real estate appraiser and mortgage broker.

NANCY STARCZYK NAMED PRESIDENT-ELECT

Joining Gina Uzunyan on the 2016 SRAR leadership team will be REALTOR Nancy Starczyk, who was elected to the position of President-Elect by the board of directors. Per association bylaws, Starczyk will serve as President in 2017.

A REALTOR for 25 years, Starczyk has a long and distinguished resume of service to the real estate industry and community. She is completing her fifth year on the SRAR board of directors as well as chairing the SRAR Governmental Affairs Committee. She has also served on the Finance, Education, Events, and Nominating committees. She has served on the Santa Clarita Valley division council of SRAR for 18 years and has been the division council President four times. In recognition for her service to the association, Starczyk received the SRAR Association

Service Award in 2011 and was recently named the 2015 SRAR REALTOR of the Year. Uzunyan, Starczyk and the 2016 board of directors will be installed at the annual Installation Gala, January 23rd at the Sheraton Universal Hotel. See REALTOR Report and visit www.srar.com for information.

O AVOID HOA HORROR STORIES

FIRST-TIME HOME BUYERS RIGHTFULLY VIEW CONDOMINIUMS AS THE FIRST RUNG ON THE HOUSING LADDER. YET UNDERSTANDING A "RESERVE STUDY" AND SPOTTING SIGNS OF TROUBLE BEFORE BUYING CAN AVOID HEADACHES AND HEARTACHES WHILE SAVING PLENTY OF CASH.

There are specific issues to question and items to inspect that will give prospective buyers insight into the financial health and condition of a home owners' association and the physical property.

An excellent place to begin is by understanding and reviewing what is known as a condominium's "reserve study," which every HOA is required to regularly update.

A reserve study details a HOA's longterm needs and funding plan, showing expected expenditures and how much the HOA has saved to offset anticipated maintenance and repairs.

For example, if the complex has a pool and spa, the reserve study will give an estimate as to when each pump or heater or filter likely will need to be replaced. It could be ten years if the equipment is new or it could be next year if it's been in service for a long while.

If the reserve study says approximately \$10,000 will be needed to replace the pool equipment in two years, buyers need to know if the HOA has that money in reserve. If the HOA has "zero" cash in reserve and if the equipment fails next month the choice will be simple, shut down

the pool and spa, thus devaluing the property, or impose on each owner in the HOA a special assessment.

If they want to minimize unexpected assessments, buyers need to know before they buy to what percent the reserve study is funded.

Zero percent to 30 percent in reserve means a special assessment is likely the next time something major must be repaired; 31 percent to 70 percent funding of the reserve suggests the HOA is a medium risk; 71 percent to 100 percent is low risk.

Other questions a prospective buyer ought to pursue include:

 How much does the reserve study recommend the HOA save each year? How much is the HOA actually setting aside?

- Are monthly dues adequate to meet current and future expenditures? The reserve study estimates what monthly dues should be to keep the HOA financially sound. If dues are not at the recommended level, buyers need to know why.
- Has the HOA been following the reserve study recommendations and making capital improvements?
- · How much money can an owner expect will be needed compared to what the HOA has saved? Realtors need to encourage their buyer to call the HOA's management company and, ideally, speak with the HOA's directors, who are home owners and perhaps the best source of current information.

A buyer could make receiving answers from the seller a condition of the

HOA's covenants, conditions, and restrictions? • Have there been any repairs from

extensive water or termite damage in the last couple years?

• The buyer needs to review the HOA's covenants, conditions, rules, meeting minutes, violation policy, collection policy, and other aspects.

A buyer would be wise to make a checklist of things to inspect and tasks to complete as part of their due diligence reviews and inspections.

Buyers could face mammoth assessments stretching over multiple years if, for example, the HOA has not been maintaining the exterior of buildings or neglecting capital improvements.

A special assessment could be minor,

\$1,000 per owner, or it could be \$30,000 per owner. In one aging local condo complex the tab came to \$80,000 per owner.

Too many buyers focus on only the property they intend to purchase. Instead, also focus on neighboring units and common spaces, being on the lookout for telltale signs of deferred maintenance, including:

- Are fences rusting?
- Are signs in disrepair?
- Does the asphalt look like gravel?
- Are the pool and other amenities clean

and in working order?

- Do the buildings need to be painted?
- Are staircases and balconies in poor

condition?

- Are there grading issues that might cause flooding?
- What is the condition of the gutters, and fixtures? Unfortunately, too many HOA's—estimated at 70 percent—are underfunded or poorly managed.

Consequently, some are falling into disrepair, losing value with each neglected repair while putting all owners at risk of unexpected financial hardship.

Condominium living can be fantastic fun, yet buyers need to go into a condo purchase with eyes wide open and make a commitment to stay involved long after escrow closes.

3

purchase contract.

Other key questions include:

- Have there been any special assessments before? Get the details and ask if there is discussion about having another special assessment.
- •Have any lawsuits been filed or are pending or expected? Check court records.
- How many, for what and in what amounts have insurance claims been pursued by the HOA?
- If roofs are an HOA responsibility, how many roof repairs have there been completed in the last couple years? The reserve study should indicate the number of years remaining before the roof most likely will need to be replaced.
 - Are there plans to revise the

FREDDIE MAC WARNS BUYERS OF CREDIT SCAM

FREDDIE MAC ISSUED A WARNING RECENTLY FOR PROSPECTIVE HOME BUYERS ABOUT SCAMS THAT TRY TO ENTICE THEM WITH PROMISES OF RAISING THEIR CREDIT SCORE IN EXCHANGE FOR MONEY.

Consumers eager to buy a home — especially those hurt by the housing crisis of last decade — are too easily lured by the promise of an improved credit score, which can yield a reduced monthly payments and a lower interest rate on a home loan.

It's easy to be lured by the promise of a raised credit score.

Yet schemes that falsely claim to raise credit scores complicate life for borrowers, while costing them time and money to combat origination fraud and servicingrelated fraud. Freddie Mac highlighted three types of common scams:

• Disputing credit with credit bureaus — A legitimate new program called FICO Score Open Access for Credit & Financial Counseling was created to help borrowers who have credit management problems.

management problems.

It provides FICO scores along with credit education material to help consumers understand credit scoring and learn more about financial management.

However, some con artists use the program

They direct a borrower to contact credit repositories repeatedly to dispute previously defaulted debt, Freddie Mac warned. The hucksters hope the creditor will miss responding to one of the disputes and the defaulted debt will disappear ... temporarily triggering a jump in the borrower's credit score. The borrower may qualify for — and close on — a new mortgage before the credit report correctly reflects the defaulted debt and the borrower's true credit score, which could trigger a probe by the lender.

• Claiming identity theft falsely —

Some companies encourage buyers to falsely claim identity theft on their loan application in order to have debt removed from their credit report. Borrowers who falsely claimed identify theft have gone as far as providing affidavits of identity theft and police reports. Lenders take identity theft claims seriously and investigate.

In some instances, they discover that the "police report" was a fake, never actually filed, or from a police department that does

• Misusing credit protection numbers

— Using a nine-digit credit privacy or secondary credit number — an alternative for a Social Security number that is most commonly used by celebrities and politicians to hide previous credit issues — can be a dangerous move.

Some consumers with poor credit acquire a CPN with the intent of creating a new, clean, yet often misleading, credit profile, Freddie Mac notes.

CPNs were not created for this purpose, and mortgage loans originated using a CPN are ineligible for sale to Freddie Mac.

Borrowers who use a CPN with the hope of leaving their bad credit histories in the rear view

mirror are in for a rude awakening.

The Federal Trade Commission bluntly states that by using a stolen number as a borrower's own, the con artists will have involved the borrower in identity theft, for which the borrower could well face legal trouble.

Who Gained the Most Equity?

A nationwide study released Wednesday found that the average home seller nets about a 23 percent gain in equity from the time they purchase their property — or about \$40,000. But a closer look at the data reveals that sellers who purchased during certain volatile years tend to fare worse than others.

Home owners who purchased their home eight to 10 years ago—from 2005 to 2007, during the height of the real estate bubble—have earned just \$3,000 or 1 percent in equity during that time, says Jessica Lautz, managing director of survey research and communication for the National Association of Realtors, which conducted the study.

Those home owners may show the most reluctance to sell their homes, and that may be adding to the inventory shortage in many cities, Lautz says.

The attached breakdown shows who fared the best in the equity picture.

6-7 years	\$31,000	14
8-10 years	\$3,000	1
11-15 years	\$38,000	23
16-20 years	\$95,000	63
21-plus years	\$138,000	145
All sellers	\$40,000	23

Pat 'Ziggy' Zicarelli

Local Realtor Leads State Group

Pat "Ziggy" Zicarelli, a San Fernando Valley Realtor and a past president of the local Southland Regional Association of Realtors, was installed Tuesday as the 2016 president of the 175,000-member California Association of Realtors.

Serving with Zicarelli, pictured second from left, are President-elect Geoff McIntosh, Treasurer Jared Martin, and Chief Executive Officer Joel Singer.

Active in organized real estate since 1976, Zicarelli, a second-

generation Realtor, previously served as C.A.R. president-elect and has filled in other leadership positions for his local, state, and national associations of Realtors. At the state level, Zicarelli has served on numerous committees.

At the national level, Zicarelli is a member of the National Association of Realtors' 2016 executive committee, chairman of the Realtor Political Action Committee participation council, and has lead numerous other committees. He was inducted into NAR's Realtor Political Action Committee Hall of Fame in 2014, and has been a member of Presidents' Circle since 2011, and an NAR Golden "R" member since 2000.

Geoff McIntosh, a Long Beach broker, has previously served as the Association's treasurer in 2014 and 2015.

Jared Martin is a Central Valley real estate broker. As a third-generation Realtor, he has worked with his family's business for the past 14 years.

Joel Singer, the associations chief executive officer, has held the top staff position since November 1989 after serving as C.A.R.'s chief economist and heading the Association's public affairs department. He was instrumental in developing Real Estate Business Services Inc., C.A.R.'s for-profit subsidiary, and serves as its president. He also is president and chief executive officer of zipLogix. Singer joined C.A.R. in 1978.

SAN FERNANDO VALLEY HOME SALES RISE 6%

WHILE SHOWING SIGNS OF A SEASONAL SLOWDOWN, THE HOUSING MARKET IN THE SAN FERNANDO VALLEY STAYED BUSIER THAN EXPECTED DURING OCTOBER WITH

THE 523 SINGLE-FAMILY HOME SALES UP 5.9 PERCENT OVER A YEAR AGO, THE SOUTHLAND REGIONAL ASSOCIATION OF REALTORS REPORTED WEDNESDAY.

With activity typically tapering off as holidays approach, the October total was down 10.1 percent from this September.

The local home resale market hit its peak in July with 603 closed escrows.

Realtors also facilitated 209 condominium sales last month, up 37.5 percent over a year ago and 1.0 percent higher than this September. The total was one sale shy of the 210 sales posted in June, which was the highest condominium tally since July 2013.

"Improvement in the jobs market has yielded added interest in home buying," said Gaye Rainey, president of the Southland Regional Association of Realtors. "Yet expandedinterest by buyers comes with a still too- tight inventory and higher resale prices, which makes it difficult for some buyers to qualify for a home loan, even as interest rates remain exceptionally low."

The single-family median price of \$562,000 was 7.9 percent higher than October 2014 and 1.3 percent ahead of this September. Since hitting \$600,000 in July for the first times since 2007, the median has been hovering below that benchmark, partly because of resistance from buyers.

The condominium median resale price of \$369,000 was up 16.4 percent over a year ago and 6.6 percent ahead of the September median price. It was just short of the \$370,000 high set in August, which was the highest since November 2007.

"No doubt affordability is as big a factor as the limited supply of homes listed for sale," said Jim Link, the Association's chief executive officer. "There are fewer instances of multiple buyers competing for quality properties, which eases the upward pressure on prices."

The inventory of homes listed for sale continued to shrink with the 1,659 active listings throughout the San Fernando Valley down 10.2 percent compared to

Housing Demand Expected to Grow

Statewide home sales exceeded the 400,000 level in October for the seventh consecutive month and posted higher on a year-to-year basis for the ninth straight month, the California Association of Real-tors reported recently.

Due to a multiple reasons, including seasonal forces, California's hous-

ing market softened on a month-to-month basis as statewide sales and median prices contracted compared to September.

"With job growth increasing the most since late 2014 and interest rates remaining below 4 percent, the demand for housing should continue to grow at a modest pace," said 2016 C.A.R. President "Ziggy" Zicarelli. "Statewide sales are on track to finish the year with a mid-single-digit increase from last year."

The October sales figure was down 5.1 percent from September and up 1.3 percent compared

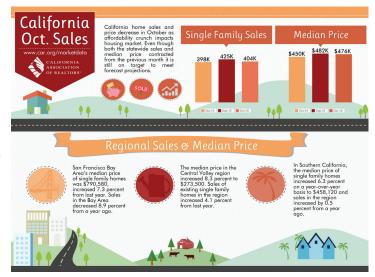

with home sales in October 2014.

The year-to-year increase was the lowest since January 2015 and was significantly below the six-month average of 9.7 percent observed between April 2015 and September 2015.

The median price of an existing, single-family detached California home slipped 1.3 percent in October to \$475,990 from a revised \$482,150 in September. October's median price was 5.7 percent higher than

the revised \$450,460 recorded in October 2014.

"Housing affordability is an issue in many parts of California, and the impact it has on sales varies from region to region," said C.A.R. Vice President and Chief Economist Leslie Appleton-Young. "... We're now seeing the negative effect on sales due to low housing affordability as higher prices have put home buying out of reach for many potential buyers."

Santa Clarita Home Sales Up 7%

A total of 205 single-family homes and 93 condominiums changed owners during October throughout the Santa Clarita Valley, the Southland Regional Association of Realtors reported Wednesday.

The 205 home sales were up 7.3 percent over a year ago and, following seasonal patterns, fell 2.4 percent from this September. Except for January and February, every month this year has come in above the 200-sale benchmark with the peak being 255 home sales in July. The 93 condominium sales were down 10.6 percent from a year ago and off 8.8 percent from September. Until last month, the monthly totals exceeded 100 condo sales for five consecutive months, with the 121 closed escrows of August the highest this year and the highest since December 2012.

"Santa Clarita is a highly desirable community for home buyers making it likely home buying activity will remain busy even as the holidays approach and sales taper off elsewhere around the state," said Bob Khalsa, president of the Santa Clarita Division of the

Santa Clarita Valley Div.

Southland Regional Association of Realtors. "The biggest limitations currently are the limited inventory and rising concerns regarding affordability, even with the ongoing availability of very low interest rates on home loans." The median price was \$500,000, up 9.4 percent over a year ago, yet off 2.9 percent from September.

a year ago. At the current pace of sales, that represents a 2.3-month supply when what the market really needs is a 6-month supply to achieve some balance.

Pending sales were up 4.2 percent over a year ago, which suggests activity will continue to be stronger than expected as the year draws to a close.

Distressed sales are holding only

a small share of the market. Of the total 732 combined residential closed escrows last month, 93.0 percent were standard sales involving traditional buyers and sellers. Foreclosurerelated REO sales came in at 3.0 percent while short payoffs, where the lender agree to a sale price less than the outstanding loan balance, fell to 2.6 percent.

REALTORS GAIN STATUS, CLIENTS BY OFFERING SWIFT INFO

PROSPECTIVE HOME BUYERS AND SELLERS BENEFIT WHEN WORKING WITH A REALTOR WHO DELIVERS MEANINGFUL

INFORMATION IN A SUCCINCT, CLEAR, YET CONVERSATIONAL WAY.

Not surprisingly, real estate professionals who concentrate on fulfilling client needs see their practice grow as their reputation as a credible real estate expert expands.

Those conclusions came during a forum discussion as Realtors from throughout the nation met recently in San Diego.

Celeste Starchild, vice president of Move and general manager at ListHub, shared business intelligence about how consumers are increasingly using online and digital technology during the home search process.

She also discussed ways Realtors can utilize search engine optimization and targeted advertising to reach consumers at the time they are most ready to buy or sell a home.

According to Starchild, a majority of

6

consumers today are what she called "digital natives." Mostly from either the Millennial or Gen X generation, these are potential buyers who have been around technology their entire life and never experienced a time when the Internet was not readily available.

As time goes on and technology evolves, there are increasingly more people who don't know how to do business without going online

first

"Consumers want immediate responses from their friends and family via email and texting," she said. "Realtors risk missing an opportunity with this important buyer demographic if they aren't responding in a timely, informative and personable manner."

Explaining ways Realtors can be more visible to consumers online, Starchild said it's important to focus advertising efforts on performing websites like Realtor.com, and utilizing search engine optimization can ensure that a Realtor's name and brokerage show up at the top

of the list on search engine sites.

"Search engine marketing drives high quality and high volume leads," she said. "If you have the budget, you can pay for the right to have your name and business visible to practically all consumers looking for an agent online in a specific location." Predictive advertising efforts on social media – especially Facebook – can also be an extremely successful and cost-effective marketing tactic for Realtors.

Starchild described scenarios such as marriage, job relocation and child birth as home purchase drivers that Realtors can focus on by having a targeted ad with their information appear on the right side of a potential buyers' Facebook page.

"Reaching the right consumers at the time they're most ready to buy is powerful and effective," she said.

Practically every interested buyer or seller will search online for information about a Realtor and likely read reviews before contacting them. What comes up in those search results is what consumers will use to determine whether or not to reach out.

"It doesn't matter where on a search list a Realtor shows up if they don't have an updated profile with a professional headshot, listed contact information and a few client recommendations," she said. "Failing to do so will ultimately lead to missed business."

Once a potential client has requested information about a listing, Starchild said data show a Realtor can increase their contact rate by as much as 900 percent by responding to leads in the first five minutes. Whether it's personally in a few sentences or in an automated message with a promise to follow-up quickly, that initial communication is crucial.

"Consumers are looking for facts and they want them now," she said. "How you respond and interact with them influences their decision on whether or not they're your client forever, or they're on to the next one."

Maximum Loan Limit Unchanged

California Realtors expressed dismay at the recent decision by the Federal Housing Finance Agency to will leave maximum conforming loan limits for mortgages acquired by Fannie Mae and Freddie Mac largely unchanged through 2016.

The loan limits will stay at \$417,000 on one-unit properties and a cap of \$625,500 in high-cost regions, such as most of California and Hawaii.

"Realtors are disappointed that the FHFA didn't raise the Fannie Mae and Freddie Mac conforming loan limits for next year," said Pat "Ziggy" Zicarelli, the 2016 president of the California Association of Realtors. "Home prices in California have risen sharply over the past four years, yet conforming loan limits haven't changed during that time. Not increasing the loan limits will hurt California's housing market, further exacerbating housing affordability and preventing tens of thousands of California home buyers from a chance at home ownership."

Some of the largest conforming loan limit increases for 2016 will occur in Sonoma County, Calif., where the loan limit will rise by \$33,350 – from \$520,950 to \$554,300. Also, several Denver-area counties will see sizable increases by up to \$34,500 for next year – with loan limits rising from \$424,350 to \$458,850. Monterey County, Calif., will rise by \$26,450 – from \$502,550 to \$529,000. Also, in San Diego County, loan limits will rise \$18,400 from \$562,350 to \$580,750.

However, FHFA says most cities will not see the change in loan limits because the agency determined that the average U.S. home value in the third quarter of this year remained below its level in the third quarter of 2007.

The Southland Regional Association of REALTORS® (SRAR) is wrapping up its Membership Dues Campaign "Check the Box". Members were asked to "Check the Box" to contribute \$20 of their SRAR dues to the REALTOR® Action Fund (RAF). RAF raises money to promote the values, attitudes, and beliefs of organized real estate, and every dollar is used to protect and advance REALTORS® interests in

government. There is no addition cost to REALTOR® members when they checked the box! And. all eligible members are automatically entered into a drawing for an iPad Air. (see rules at www.srar.com/raf)

If you did not Check the Box when you paid your dues, you will be receiving a letter asking if you would like to make that contribution. Please "Check the Box" and return the form to Southland Regional

Association of REALTORS®. By becoming a contributor, you become an even more important part of the political process. All you have to do is Check the Box!

WEEPSTAKES BEGINS:

Tuesday, November 17, 2015

SWEEPSTAKES ENDS

Friday, September 9, 2016

*Winners need not be present to win.

DRAWING HELD ON:

TBD, Fall of 2016

5:30 p.m. at the Multicultural Mixer at:

SRAR Office

7232 Balboa Blvd. Van Nuys, CA 91406

Contributors of \$20.00 or more have three opportunities to win a 64 GB iPad Air 2 w/ WiFi, each valued at \$599. The more you contribute, the more opportunity you have to win!

ONE ENTRY = \$20 / Introductory Level

THREE ENTRIES = \$49 / "Min. Cost of Doing Business"

NINE ENTRIES = \$148 / "True Cost of Doing Business"

See official rules, odds and other details on srar.com/raf

Check the Box and you are automaticly entered
