### NEW HUD CONDO RULES TO HELP BUYERS

The Department of Housing and Urban Development on Aug. 14 announced revised condominium loan policies that are likely to help thousands of buyers nationwide, especially in high-price urban areas like Los Angeles.

Specifically, the finalized new guidance extends condo certifications from two years to three, allows for single-unit mortgage approvals, provides more flexibility with owner/occupancy ratios, and increases the allowable number of FHA loans allowed in a single project.

The rule will go into effect in mid-October — 60 days from publication. HUD believes the changes will extend critical benefits to aspiring homeowners. The National Association of Realtors commended HUD for finalizing the new policies. The changes, many of which NAR has championed for over a decade, should yield thousands of new homeownership opportunities and help alleviate affordability restraints impacting markets across the country.

"We are thrilled HUD has taken this much-needed step to put the American Dream within reach for thousands of additional families," said NAR President John Smaby. "Condominiums are often the most affordable option for first-time homebuyers, small families and those in urban areas." "This ruling, which culminates years of collaboration going back to 2008 between HUD and NAR, will help reverse recent declines in condo sales and ensure the FHA is fulfilling its primary mission to the American people." NAR's most recent existing-home sales report for June found that condo sales nationwide declined 6.5 percent from the same time last year. With more than 8.7 million condo units nationwide, only 17,792 FHA condo loans were originated over the past year. Lawrence Yun, NAR's chief economist, recently noted that even though median prices for existing condos have risen slightly, their relative affordability means condominiums remain a natural answer to inventory shortages holding back home sales growth. "Condos are typically more affordable than a detached single-family home, but only a small fraction of condo HOAs are FHA-certified," he said. In conversations with HUD, NAR has advocated for changes to FHA's condo policies that include allowing owner-occupancy level determination on a case-by case basis, granting up to 45 percent commercial space withoutdocumentation, and including a five-year approval period for project certification.

### CALIFORNIA LEADS WITH LOAN HELP

BY DAN TRESIERRAS, PRESIDENT, AND DAVID WALKER SOUTHLAND REGIONAL ASSOCIATION OF REALTORS

More than any other state in the nation, California offers the greatest number of home downpayment assistance programs.

In fact, California, followed by Florida and Texas, provide nearly onethird — 31 percent — of the 2,516 downpayment assistance programs tallied nationwide by DownPaymentResource.com.

Of that total, California leads with 343 programs, Florida with 289, and Texas at 148.

Yet assistance programs don't go far enough in regions with a high and growing population, mountainhigh prices, and inventory woefully inadequate to meet demand. Too often funds allocated for homebuyer assistance either don't materialize or vanish overnight in the flood and backlog of applications.

So the key information a service like DownPayment Resources can provide tends to be about the programs that are still funded.

Neighborhood Stabilization Programs: Designed

The company's first and second quarter 2019 homeownership program index found that the 62.4 percent of Golden state's assistance programs still had funds available.

That translates into 214 programs where a prospective qualified buyer can sign up and still have a reasonable chance of winning assistance.

The flip side of that coin is that because programs often run out of funds so quickly, too many would-be buyers never submit an application and lose out on what could be a golden opportunity to ease their way into home ownership.

There also are 46 nationwide programs aimed at specific needs and communities, of which 97.8 percent still have funds available.

"It's encouraging to see more homebuyers accessing the downpayment help they need to make homeownership more affordable," said Rob Chrane, CEO of Down Payment Resource. "It's information that helps housing professionals and homebuyers easily identify opportunities that will work for their situation."

A common myth about assistance programs is that they are only available to

first-time buyers. Yet, the share of programs without a first-time buyer requirement

increased to 41 percent, up 2 percent from the prior survey.

That means more programs can serve repeat and move-up buyers, with most programs using HUD's definition of a firsttime buyer as someone who has not owned a home in the past three years.

Other key findings include: 72.5 percent of programs are available in a specific local area, such as a city, county or neighborhood; 27.5 percent are statewide through housing finance agencies; 22 percent allow buyers to purchase a multi-family property as long as the buyer occupies one of the units; 8 percent are available to community service workers, including educators, police officers, firefighters, and healthcare workers.

### Where Will Our Children Live?

Ensuring homeownership opportunities for Californians young and old — starts with increasing supply to end the state's housing availability and affordability crisis.

A recent survey found that 53 percent of Californians and 63 percent of Millennials are considering moving out of state due to high housing costs.

We have heard loud and clear from our membership of more than 200,000 Realtors and brokers the desire for lawmakers to embrace policies like Senate Bill 50 that increase the housing supply," said Jared Martin, president of the California Association of Realtors. "California Realtors applaud Lt. Gov. Eleni Kounalakis, Controller Betty Yee, Treasurer Fiona Ma and Insurance Commissioner

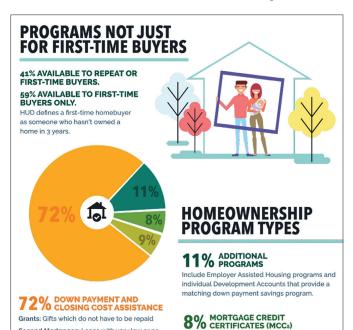

Ricardo Lara for endorsing SB 50," which encourages the development of mid-rise and multifamily housing construction around major transit hubs. The support for SB 50, introduced by State Senator Scott Wiener, D-San Francisco, by "four statewide elected officials demonstrates growing momentum for meaningful solutions that prioritize increasing the housing supply to solve California's housing availability and affordability crisis," Martin said.

C.A.R. has mounted a statewide campaign called "Let's Get Serious on Supply" that calls on state leaders to support policies that increase the housing supply and asks the very serious question: "Where will our children live?'

"The situation is dire and getting worse," Martin said. This also comes on the heels of a new Google Survey conducted by C.A.R. that found 80 percent of Californians believe our state's elected officials have not done

enough to increase the housing supply.

As proud cosponsors of SB 50, C.A.R. stands committed to working with the California legislature, Gov. Gavin Newsom and other advocates to pass this bill with the urgency California's housing crisis requires.

My purpose as a Realtor and contributor to SRAR is to be of service to my clients, homeowners, fellow Realtors, and my industry as a whole. I do this by continuing to pursue Education, by participating at SRAR, and by protecting the rights of homeowners, while remaining an ethical and honest professional Realtor. My contribution is to educate my community

### Rates at Multi-Year Low

### JULY HOME MEDIAN PRICE SETS RECORD

BY DAN TRESIERRAS, PRESIDENT, AND DAVID WALKER SOUTHLAND REGIONAL ASSOCIATION OF REALTORS

For the second consecutive month, the median price of homes that closed escrow throughout the San Fernando Valley during July set a record high at \$735,000, the Southland Regional Association of Realtors reported Tuesday.

The median was up 6.4 percent from a year ago, beating the prior record of \$722,000 set in June, and was only the second time ever that the local median — which means half the homes sold for more and half for less exceeded the benchmark of \$700,000.

The July median was dramatically higher up 116.8 percent — from the low point that came in the wake of last decade's Great Recession.

"After peaking at \$655,000 in June 2007 following years of an out-of-control boom market, the median home price plunged to \$339,000 in December 2011," said Dan Tresierras, president of the Association. "The home median price didn't hit the \$600,000 range again until 2016 and now, in a more stable if inventory-challenged market, the median price is in uncharted territory.

"No doubt about it, today's prices are wonderful for sellers yet pose an affordability

challenge to too many buyers," Tresierras said.

median price set a record high in June at came in at \$450,000. off 1.1 percent from the high, though still up slightly from a year ago.

Sales of both homes and condominiums fell with homes off 7.7 and 155 condominium transactions in July.

"Interest rates on home loans recently dipped even lower than in recent months and now hover at levels not seen in many years," said Tim Johnson, the Association's chief executive officer. "Lower rates give buyers greater buying power that can offset the impact of higher prices.

"High prices, low inventory, affordability challenges. What more can you say," Johnson said. "I did think, however, that prices would have stabilized rather than set a new record."

At the end of July there were 1,309 active listings of homes and condominiums throughout the San Fernando Valley. That

July was the first month of the last four to see an increase in the income needed to qualify for a  $percent \ \ and \ \ condos \ \ _{loan \ on \ the \ purchase \ of \ a \ median-priced \ home \ in \ the \ San \ Fernando \ Valley. \ Extremely favorable}$  $down \ 2.5 \ percent$  interest rates have offset some of the impact of rising prices. The July median — meaning half from year ago tallies. of the month's sales were lower and half higher – hit a record high of \$735,000. A minimum income of \$149,127 was needed to win an 80 percent loan or \$588,000 at an interest rate of Realtors assisted 478 3.77 percent. All monthly housing costs totalled \$3,728 – with \$2,730 going to principal and single-family home interest, \$766 for the monthly property tax, and \$233 the monthly home insurance premium.

was down 5.7 percent from a year ago and was the second consecutive monthly drop after nearly a year of consecutive, if modest, gains in the number of properties listed for sale.

At the current pace of sales, the inventory represented a 2.1-month supply, which tilts the market in favor of sellers. The inventory total was closer to the record low 819 listings of December 2017 than to the record high 14,976 listings reported in July 1992.

Pending escrows — a measure of future sales activity — totaled 727 properties, which were up 0.7 percent from a year ago

### NEIGHBORHOOD, **SCHOOLS MATTER TO** BUYERS WITH KIDS

BY DAN TRESIERRAS, PRESIDENT, AND DAVID WALKER SOUTHLAND REGIONAL ASSOCIATION OF REALTORS

Everyone brings a particular sensibility to each transaction, yet buyers and sellers with children under the age of 18 have unique needs, different purchasing habits and seller preferences, when buying or selling a home.

The most stark difference between home buyers with kids and those who do not have children is the importance of the neighborhood.

Not surprisingly, the "2019 Moving with Kids" report from the National Association of Realtors found that 53 percent of buyers who have children look to the quality of the school districts while 50 percent choose a neighborhood and home based on the convenience and proximity to schools.

"Parents inherently make sacrifices for their children and family, and that is no different when shopping for home," said Lawrence Yun, NAR's chief economist. "We've seen buyers with kids willing to spend a little more in order to land a home in a better school zone or district."

For roughly half of all buyers regardless of children, finding the right property was the most difficult step. Nearly nine out of ten buyers, 86 percent, found what they wanted with the assistance of a real estate professional.

Interestingly, 67 percent of buyers with children preferred that an agent send them property info and communications via text message while 74 percent of buyers without

children preferred a phone call. The difference may reflect the time crush of today's pace of life along with the need to simultaneously raise a family.

The national survey found that buyers with children ultimately purchased larger homes and properties. Generally, they opted to buy homes that measured 2,110 square feet with four bedrooms and two full bathrooms. By comparison, buyers without children nationwide on average

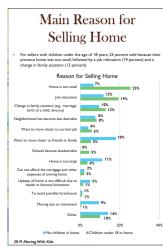

What Sellers Want Most From Agent What Sellers Want from Agent

bought a home 1,800 square feet in size with

three bedrooms and two bathrooms.

A quarter of buyers with

kids delayed a purchase due to child care expenses, while others ultimately made compromises and concessions. Nearly a third said they compromised on the condition of the home, while 31 percent said they settled on a home smaller than originally desired. Twenty-four percent compromised on the final purchase price.

### City Sign Ordinances

### SAN FERNANDO AND SANTA CLARITA VALLEY

Listed below for your reference, are the specific municipal regulations, along with the regulations for L.A. and Ventura Counties that apply in unincorporated areas or those cities without specific municipal codes. SRAR highly advises REALTORS® to check the current laws, and follow these best practices as they will help preserve our rights as REALTORS® to use temporary signs:

- 1. Only post temporary signs (directional or open house) when you have an open house.
- 2. Always observe time and placement restrictions for signage.
- 3. Always obtain a property owner's permission before placing a temporary sign on someone's property whether their property is residential or commercial.
- 4. Never place temporary signs in the medians or rights of way meaning along the streets or sidewalk and observe Americans with Disabilities Act regulations.
- 5. Decrease visual clutter by "piggy backing" off of other directional signs, placing your directional signs only when your directions divert from other directions.
