This is the third and final session of the Financial Literacy Series provided by the Southland Regional Association of Realtors. Expert speakers included: Houan Hormozian, CAMP Pres. 2022-2023; Kenya Hughes, Real Estate Consultant; Jonathan Sarrow, Board member of SHE IS HOPE, and; Phillip Atwan, Senior V.P., Exchange Resources, Inc.

Fed Issues Third Steep Rate Hike

The Federal Reserve made history on Wednesday, Sept. 21, approving a third consecutive 75-basis-point hike in an aggressive move to tackle the white-hot inflation that has been plaguing the US economy, CNN Business reported.

The supersized hike, which was unfathomable by markets just months ago, takes the central bank's benchmark lending rate to a new target range of 3 percent to 3.25 percent. That's the highest the fed funds rate has been since the global financial crisis in 2008.

Wednesday's decision marks the Fed's toughest policy move since the 1980s to fight inflation. It will also likely cause economic pain for millions of American businesses and households by pushing up the cost of borrowing for things like homes, cars, and credit cards.

For the first time since 2008, 30-year fixed-rate mortgages hit 6 percent, with the expectation that rates now could go even higher later this year.

One year ago, they were less than 3 percent.

REALTORS HONOR TOP LEADERS

BY JEFF PHILLIPS, PRESIDENT, AND DAVID WALKER SOUTHLAND REGIONAL ASSOCIATION OF REALTORS®

The 11,000-member Southland Regional Association of Realtors selected Bob Khalsa as the 2022 Realtor of the Year at its 24th Annual Awards Gala.

Erika Kauzlarich-Bird also was honored with the Association's Service Award along with Tammy Karaba who was selected as the 2022 Affiliate of the Year.

Respected for the way he advocates for what he thinks is right, Khalsa said the surprise selection for the Association's top honor triggered a rare moment of speechlessness, which soon evolved into joy and pure gratitude.

"This Association has given me so much,"

Khalsa said, "and I learned so much.

"I really love the people who make up SRAR....They come from so many different backgrounds,"

Khalsa said. "The quality of a professional association boils down to the culture that is created, to the people who are included."

In presenting him with the top honor, Rana Linka, the Association's 2021 Realtor of the Year, said that Khalsa is a "mover and shaker," and "one of the most interesting people you will ever meet."

Tammy Karaba, the Affiliate of the Year, said that she was "grateful for the recognition" ... of her volunteer work. "Here's to a bright future. I'm so very

2022 Realtor of the Year

honored." Jerry Ascencio, t h e 2 0 2 1 Association Service Award Recipient, in introducing the 2022 honoree noted the there is "no greater gift from God than the gift of service."

Tammy Karaba

2022 Affiliate of the Year

Brushing aside tears, Kauzlarich-Bird said that real estate was not her initial chosen

2022 Association

profession, but it has "given so much to me. I'm honored to have had a chance to give back."

Jeff Phillips, president of the Southland

Regional Association of Realtors, said that more than usual, 2022 was a "team year" due to changes brought on by the end of pandemic restrictions and a return to the Association's offices in Van Nuys and Santa Clarita.

"The board of directors has been phenomenal," Phillips said, willingly taking on multiple challenges, including a nationwide search for a new chief executive officer, which culminated recently.

With new leadership in place, Phillips expects the new CEO to lead the Association in its "ongoing pursuit of change and growth."

The awards gala also was an opportunity to honor the many professionals who give of their time to lead multiple committees, including: Imelda Leano, affiliates; Sue Horowitz, commercial investment; Ron Henderson, communications; Tisha Janigian, equal opportunity; Wendy Silver Hale, ethics & arbitration; Maria Valencia, events/community relations; Nancy Starczyk, governmental affairs; Linda Fox, professional standards; Starr James, YPN; Louisa Henry, Santa Clarita Valley Division council chair; Anthony Bedgood, Santa Clarita Valley governmental affairs; Eleanor Dullas, education; Craig Forry, grievance; Irene Reinsdorf, MLS; Diane Sydell, past presidents advisory committe chair, LCRC Trustees chair and nominating committee chair.

Realtor of the Year Bob Khalsa is congratulated by leaders of the Southland Regional

Association of Realtors, including, from left to right, Imelda Leano, affiliates committee chair; Nicole Stinson, Santa Clarita Division Council; Louisa Henry, 2022 Chair of SRAR's Santa Clarita Division Council; Erika Kauzlarich-Bird, 2022 Association Service Award recipient; past SRAR presidents Gina Uzunyan and Nancy Starczyk, seated.

The photo below honors the graduates of the most recent SRAR Leadership Academy class, including, in alphabetic order: Ana Allen, Jennifer Brown, Jane Dalea-Kahn, Shannon Galofaro, Edwin Gramajo, Edvin Hernandez, Veronica Perez, Nidia Reyes, Frank Rodriguiez, Salima Sidiqi, Vartan Tamamian, Mona Lisa Terrones, Maria Valencia. Graduates of the Leadership Academy often go on to successful real estate careers even as they carve out leadership roles within the 11,000-member Southland Regional Association of Realtors, which is one of the top 25 largest Realtor Associations in the nation.

Market Shifting as Mild Recession, Higher Rates Cut Into Housing Demand

A modest recession caused by an ongoing battle against inflation will keep interest rates elevated to suppress buyer demand and contribute to a weaker housing market in 2023, according to a housing and economic forecast released Oct. 12 by the California Association of Realtors.

The baseline scenario of C.A.R.'s "2023 California Housing Market Forecast" sees a decline in existing single-family home sales of 7.2 percent in 2023 to reach 333,450 units, down from the projected 2022 sales figure of 359,220. The 2022 figure is 19.2 percent lower compared with the pace of 444,520 homes sold in 2021.

The California median home price is forecast to retreat 8.8 percent to \$758,600 in 2023, following a projected 5.7 percent increase to \$831,460 in 2022 from \$786,700 in 2021. A less competitive housing market for homebuyers and a normalization in the mix of home sales will curb median price growth next year.

"As sellers adjust their expectations, well-priced homes are still selling quickly, said C.A.R. President Otto Catrina. "And for buyers - more homes for sale, less competition, and fewer homes selling above ing the past two years when the market was fiercely competitive."

C.A.R.'s 2023 forecast projects a dip in the U.S. gross domestic product of 0.5 percent in 2023, after a projected uptick of 0.9 percent in 2022.

With California's 2023 nonfarm job growth rate at

1.0 percent, up from a projected increase of 4.9 percent in 2022, the state's unemployment rate will edge up to 4.7 percent in 2023 from 2022's projected rate of 4.4 percent.

Stubbornly high inflation and growing economic concerns will keep the average for 30-year, fixed mortgage interest rates elevated at 6.6 percent in 2023, up from 5.2 percent in 2022 and from 3.0 percent in 2021, but will Jordan Levine, C.A.R. remain relatively low by historical standards.

Vice President and Chief Economist

"As the housing market con-

tinues to cool, the U.S. economy will moderate further and is expected to slip into a mild recession in the first half of next year," said C.A.R. Vice President and Chief Economist Jordan Levine. "High inflationary pressures will keep mortgage rates elevated, which will reduce buying power and depress housing affordability for prospective buyers in the upcoming year. As such, housing demand and home prices will soften throughout 2023.'

Realtors Issue Formal Apology for Past Discriminatory Policies

The 217,000-member California Association of Realtors formally apologized on Oct. 14 for its past discriminatory policies, including Proposition 14 - a 1960s ballot initiative that overturned the State of California's first fair housing law.

Regrettably, the California Real Estate Association — CREA, now known as C.A.R. — once played a leading role in segregation and exclusionary practices in housing. California communities still grapple with wealth and homeownership inequities. For decades, CREA promoted policies that encouraged discrimination and the idea that neighborhood integration would negatively impact property values. The Association endorsed racial zoning, "redlining," and racially restrictive covenants.

"The Association was wrong. We not only apologize for those actions, we strongly condemn them, and we will continue working to address the legacy of these discriminatory policies and practices," said C.A.R. President Otto Catrina.

CREA was behind Article 34, a law passed in the 1950s that remains in place and still makes it very difficult to build affordable housing in California. The Association also excluded women and people of color from membership.

In the 1960s, California's first fair housing law, the Rumford Fair Housing Act, was passed. CREA actively encouraged its members to support Proposition

14, a law that overturned the Rumford Act and modified California's constitution so that the state could not prohibit private property owners from engaging in discrimination. The U.S. Supreme Court overturned the proposition as unconstitutional.

In the years since the passage of the federal Fair Housing Act of 1968, the California Fair Employment and Housing Act and other fair housing laws, C.A.R. has prioritized understanding and addressing the unique homeownership barriers impacting communities of color and other historically excluded communities.

"We have continued to unpack our difficult and sometimes obscure history of opposing fair housing laws, promoting segregation and racial exclusion prior to the Fair Housing Act of 1968," Catrina said. "As an organization that deeply values inclusion, we can't change the actions of the past, but we are taking bold action now to help build a more equitable and just future."

For instance, C.A.R. recently sponsored a law requiring periodic implicit bias training for all real estate salespersons. Additionally, C.A.R. helped shape a new law that strengthens consumer protection in instances of appraisal bias.

Currently, C.A.R. is working to address the legacy of discriminatory policies in a variety of ways. These include:

• Offering a closing cost grant for members of underserved communi-

• Donating to the Black Wealth Builders Fund, a downpayment as• Donating to the Black Wealth Builders Fund, a downpayment assistance program for Black homebuyers in the Bay Area.

• Partnering with and sponsoring the work of nonprofit organizations that support greater homeownership for members of underserved communities.

• Sponsoring and supporting a variety of policies that address supply and affordability challenges for communities of color.

• Co-sponsoring a bill that would overturn Article 34, a law California Realtors helped pass in the 1950s that makes it much harder for California communities to build affordable housing.

• Supporting a law that provides a system for redacting restrictive covenants in property records.

C.A.R. will continue to develop and strengthen programs that break down barriers to homeownership. To learn more, visit fairhousingcalifornia.org.

COST OF CYBER ATTACKS? \$11 MILLION ... PER MINUTE!

BY JEFF PHILLIPS, PRESIDENT, AND DAVID WALKER SOUTHLAND REGIONAL ASSOCIATION OF REALTORS®

As digital lives grow evermore intertwined with actual lives, two conclusions become evident: First, there is no perfect de-fense, and, second, the victims of cyber crimes often enable the attack, basically leaving the door unlocked and open to criminals.

"We are increasing the size of the digital ocean we have to defend," said Ronald Manuel, who leads the FBI's Los Angeles cyber crimes task force. "A lot of what we value is online. ... Yet it's simply impossible to defend everything."

The cost of cyber attacks in 2021 was placed at a stunning \$11.4 mil-lion ... per minute. not updating latest software or hardware patches, inadequate cyber security training, and poor security policies.

"You and your people are the primary targets," Manuel said. "Intrusions are usually the result of human error."

He urged individuals and companies to follow three basic rules: Focus on cyber hygiene first, which means install software patches, use reputable antivirus programs, insist on two-factor or multifactor authentication.

Second, "know yourself ... identify your most important assets and biggest risks."

And, third, "Don't go it alone. ... Connect with the local FBI field office. ... Ask for the cyber taskforce supervisor. ... We can talk about things to do."When the L.A. Unified School District was hit with ransom ware, they knew "exactly who to call, saving precious minutes," and limiting the damage. Finally, report cyber crimes to the FBI's internet crime complaint center by going online to ic3.gov.

"It will cost the world \$1 trillion or more in a year," Manuel said. "That's our money being stolen."

Yet while some cyber criminals use sophisticated techniques and are com-puter programming experts, Manuel insisted that "what we're seeing is it's getting easier for them to do it."

He compared today's crop of cyber criminals, many of whom don't know a thing about software programming, to "knucklehead" teenagers who can produce a quality video that rivals what a major studio makes. "Technology enables us to do more with less," he said. "Same for criminals."

Cyber crimes come in three catego-ries: ransom ware, data extortion, and business email compromise, which is the area that has hit real estate hard. Manuel said business email compromise attacks soared 2,370 percent in recent years, impacting 131 countries, and leading to loses in the U.S. alone of \$5.3 billion from actual and attempted attacks.

"What have we learned?" he asked. Human error is a big thing, such as: clicking on phishing links, downloading malicious attachments, visiting untrustworthy websites, connecting infected hardware.

Beyond that, he said individuals, companies, private and public, too often have deeply flawed internal Hughes practices with no incident response plan. There's also a lack of backup procedures or not knowing how to properly restore from backups. Other lacking internal practices in-clude:

There's More to Buying than the Downpayment

Yes, a downpayment is important when buying a home, yet failure to anticipate other expenses can undermine or ruin a good purchase.

"There often are a lot of things regarding financial literacy that need to be exploited

to be explained to clients," said Kenya Hughes.

Hughes, a real estate consultant, recently joined with Melvin Fields and Deborah Hendrix, who together have 50 years experience in the mortgage arena, as part of

Kenya Hughes

the Financial Literacy series offered by the Southland Regional Association of Realtors.

"We should be talking more about the one-time expenses of a home purchase along with the recurring costs," Hughes said, noting that buyers often are shocked at what it costs to move.

"The expense to actually move within 100 miles can start at \$2,300," Hughes said. "That can double when moving farther away."

Buyers also often overlook the need to anticipate ongoing upkeep and repair expenses. Annual maintenance costs can run between 1 percent and 6 percent of a home's value, which could translate into \$10,000 to \$30,000 per year to maintain a modest home.

"And that number increases over time," she said. "It's an educational aspect that is important to discuss."

Fields said he often finds it necessary to explain in basic terms that there's a substantive difference between what a buyer wants and what they actually can afford. For example, while it's generally agreed that spending 30 percent of income on housing is ideal, in high-cost areas like Los Angeles it's not unusual to spend up to 50 percent of income.

So if the buyer earns \$10,000 per month, Fields said, a 50 percent debt-to-income ration means housing costs have to total \$5,000.

Hendrix stressed the need for buyers to avoid making common mistakes that can torpedo a home purchase: don't change jobs; don't overuse credit cards; don't use money set aside for the kids; don't buy a car.

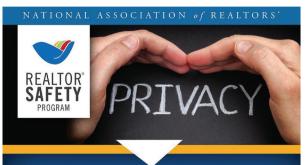

"I've seen loans that were close to closing come to a complete stop," Hendrix said, "because the buyer went over their credit limit."

Third in a Series

THE SAFETY TALK REALTORS NEED TO HAVE WITH CLIENTS

Realtor Safety Month is an opportunity for real estate professionals to improve their personal security while showing homes and guiding buyers and sellers through an involved process.

It's also a chance for homebuyers and homesellers to think about what they need to do to protect themselves and their loved ones when visiting unfamiliar

Keep personal information private. Getting to know your client does not need to include personal information about your children, where or with whom you live.

FOR MORE SAFETY TIPS FROM NAR, VISIT www.NAR.realtor/Safety

homes or allowing strangers inside their own home.

Safety is a commitment and a team effort. Here's part three of a series offering a few tips:

• Prevent buyer regret — and illness.

A growing concern reported with foreclosures or REOs: drug contamination, and how a home's tainted history can get lost if it sits in foreclosure limbo.

The number of drug-contaminated homes is growing, according to the Drug Enforcement Agency.

These drugs can seep into a home's surfaces. Unsuspecting buyers who move in may face not only a range of respiratory illnesses or neurological problems, but also a costly decontamination process of the home.

The risk from drug contamination in homes is a rising concern that has prompted more real estate professionals to raise the issue with their clients. For example, homes where marijuana was produced may be more prone to mold damage. Rewired electrical work also can present fire dangers too.

No federal disclosure law exists for methamphetamine or marijuana grow houses while the disclosure regulations vary greatly by state. Oftentimes, standard home inspections won't turn up drug contamination problems either, but requires extra testing by specialists.

Some real estate professionals have been trained to look for the signs, like the strong smell of urine or chemical smells like ammonia or acetone; trash filled with products like paint thinner, lighter fluid, drain cleaners, and cold tablet

> containers; and chemical stains on the toilets and bathtubs. Or, buyers and agents sometimes may feel some of the signs when they step inside the property, such as a burning sensation in the eyes or throat.

> Buyers can be encouraged to check the Drug Enforcement Agency's National Clandestine Laboratory Register, a searchable database of addresses that have been uncovered by law enforcement agencies to have clandestine chemicals or drug labs.

Some counties and states also have databases to track such

homes. Buyers can also purchase meth-testing kits or order a professional test for contamination.

Remember, It's For Your Safety Too

Having a safety talk with your clients is an important element in Realtor safety, too.

If sellers keep valuables out and prescription medications out in the open during showings, agents may find themselves in that potentially dangerous situation of having a criminal in your midst and being unsure what to do.

In those cases, do nothing, a security professional recommended. "The person is a criminal and they could attack or assault you if you confront them," he said. "That puts you in a bad situation."

Let law enforcement later handle it.

Educating buyers and sellers about safety issues helps avoid trouble and, in the end, keeps everyone safer in a transaction.

Instruct clients that they are responsible for their pets. If possible, animals should be removed during showings. Realtors need to make clients aware that buyers and agents are sometimes attacked by pets and the owner will be held liable.

Finally, when leaving a client's property, whether after an open house or a standard showing, make sure that all doors and windows are locked.

Thieves commonly use open houses to scout for valuables and possible points of entry, then return after the agent leaves.

Realtors need to let clients know that they will take all of the above safety precautions, but that when they return home, they should immediately verify that all doors are locked and all valuables accounted for.

Reminder: we care about you.

For the month of September (REALTOR® Safety Month), we're going to provide you with tools, tips and best practices so you can continue to take care of your clients by taking care of yourself. Here are 3 of 56 total safety tips we and NAR are providing to REALTORS® like you:

 Sturdy doors are key to home safety.
 Keep track of colleagues.

 Make sure that all your home's doors to roolid, 1 ½"
 Have a check-out employee board at the outside are metal your office, listing or solid, 1 ½"

 nardwood and have good, sturdy locks.
 customer name, date and expected return time.

You take the wheel. Do not drive clients in your car. Instead, have them meet you at the property. When you leave your car, lock it.

2022 Realtor Expo HOME SALES DIP AS COSTS OF BORROWING RISE BY JEFF PHILLIPS, PRESIDENT, AND DAVID WALKER

SOUTHLAND REGIONAL ASSOCIATION OF REALTORS $\ensuremath{\mathbb{R}}$

It's not for lack of buyers that home sales have slowed, it's the reality that a dramatic in-crease in the cost of borrowing is making buying a home practi-cally impossible for legions of would-be buyers.

After all, how many people can afford to buy when the cost of borrow-ing is 40 per-cent and creep-ing closer to 50 percent higher compared to a year ago.

While a market forecast presented by the deputy chief economist for the California As-sociation of Realtors painted a sky definitely dappled with clouds, the forecast was not even close to the black torrential downpour in the Great Recession of 15 years ago.

In fact, Oscar Wei fastidiously avoided using the "R" word, but when poked by a question from an audience member grudgingly said "we may have a housing recession in the 2nd quarter of next year, but a small one."

Wei spoke before more than 300 San Fernando and Santa Clarita valley Realtors at the recent Realtor Expo presented by the Southland Regional Associa-tion of Realtors. "Demand will continue to moderate for the rest of 2022," he said. "Home prices peaked, but will remain elevated."

Yet sales continue, albeit absent the presence of multiple offers, and inventory is slowly rising, inching closer to pre-pandemic levels, though remains well short of historical supply. "Supply constraints will continue," he said.

To some buyers, current conditions present an opportunity — more choices, less competition.

That's why Wei noted that more buyers are opting for adjust-able rate mortgages, which are less costly and recently captured 12.15 percent of all new loans.

While higher than dur-ing the era of historically low rates over the last couple years, ARMs still are way below the 30 percent level found in 2006.

And today's buyers have more skin in the game, unlike the Great Recession where fogging a mirror was the only prerequisite of getting a loan.

"Buyers' optimism has improved," Wei said, "but sellers have become less positive." Less positive is a long way from recession.

That's partly reflected in the fact that 44.4 percent of July sales were above list price, which Wei said is back to "normal" and well below the 72.8 percent of sales above list price that was common not long ago.

All the uncertainty and the pres-ence of inflation has an effect on consumer spending.

Yet there's the unemployment rate at a remark-able low of 3.7 percent. Meanwhile, wage growth of 5.25 percent can't keep up with rising prices on, well, everything.

"It's a Goldilocks labor market report," Wei said, noting that while consumer confidence rose, CEO confidence dipped.

"If we can get inflation under control," Wei said, "we should be fine."

But that will take time, he said, and is unlikely to return to pre-pandemic levels until late 2023.

SFV Rescue Mission SUCCESS CENTER OFFERS SHELTER, GUIDANCE

The San Fernando Valley Rescue Mission provides shelter and guidance for homeless families at its Home Again Family Success Center in Northridge.

The family shelter offers families the opportunity to recover from the devastating effects of homelessness by meeting the basic needs of food, clothing, and shelter while identifying the underlying reasons for becoming homeless and establishing a plan of restoration.

The Mission's Renewed Hope Recovery Program, located in Hollywood serves homeless men living with issues of substance abuse and other self-destructive behaviors.

The Charitable Foundation of the Southland Regional Association of Realtors was proud to extend a \$5,000 grant to the Mission and six other local nonprofits that help our neighbors in need. Diane Sydell, left, SRAR Charitable Foundation Chair, is pictured with David Prentice, the Mission's director, and <u>Elizabeth Duran</u>. To volunteer or to help a homeless person, go to *sfvrescuemission.org*.

REALTORS SUPPORT BILL TO RAISE CAPITAL GAINS TAX EXCLUSION, FREE UP HOUSING INVENTORY

A bipartisan bill to increase the capital gains tax exclusion on the sale of a principal residence to \$500,000 for single filers and \$1 million for joint filers was introduced into Congress on Sept. 29 by California Democratic Rep. Jimmy Panetta and Pennsylvania Re-publican Rep. Mike Kelly. The measure, if passed, also would index the exclusion to inflation.

Currently, homeowners who sell their home can exclude \$250,000 in gains from capital gains taxes, or \$500,000 in the case of a joint-filing couple, an amount set in 1997 and not indexed for

C.A.R.

inflation. This has had an outsized impact on California homeowners who face some of the highest housing costs in the nation.

"California Realtors thank Congressman Panetta for introducing the 'More Homes on the Market Act,' which will provide the necessary tax relief for California homeowners, particularly senior citizens, who have been unable to move because of the onerous tax burden that could result if they were to sell," said Otto Catrina, president of the California Association of Realtors

For working Californians, a home is their biggest and most important investment. However, because the capital gains exclusion was passed 25 years ago with no indexing for inflation, fewer and fewer families have been able to downsize and access the equity built up in their homes. This has resulted in fewer homes being available for younger and first-time homebuyers to move into, which has driven up demand and home prices even more."

MARKET MINUTE: CONSUMER CONFIDENCE ROSE, BUT ...

Americans' confidence rose to the highest level in six months in September and their spending remained steady despite higher prices.

Wage growth, however, is not keeping pace with inflation and thus consumers are increasingly relying on their savings to offset the higher cost of living.

As households' savings dwindle while higher interest rates push up credit card debt, consumer confidence could dip in coming months as economic activity slows.

As for the housing market, higher mortgage rates continue to worsen affordability and remain the major factor that holds back demand. Despite a slight improvement in sales in August, homebuying activity is expected to be sluggish in the months ahead as rates remain high.

Rates have skyrocketed more than 1 percent point in the last six weeks, crunching affordability further and deeply cutting into contract signings.

REALTORS LAUNCH 1.5 MILLION TREE PLANTING INITIATIVE

The National Association of Realtors recently announced a partnership with the National Forest Foundation that will result in 1.575 million trees being planted across the United States.

The initiative, which will plant at least one tree for each Realtor by the end of 2025, was spearheaded by NAR's 2022 President Leslie Rouda Smith.

"As part of our association's comprehensive sustainability and resilience plan, NAR is leading by example, like we always do," said Rouda Smith. "We're helping to foster more vibrant communities by increasing the number of trees around us, delivering cleaner air, enhancing stormwater mitigation and encouraging biodiversity in ecosystems.

"We are thrilled to partner with the National Forest Foundation as part of our ongoing efforts to support the millions of consumers and communities that we, as Realtors, serve every day."

Planting 1.575 million trees reduces 750,000 metric tons of carbon in the atmosphere. This is equivalent to 145,931 homes' electricity use for one year or the annual operation of over 160,000 gas-powered passenger vehicles, according to EPA calculations.

Determinations on when and where trees will be planted will be made based on repopulation needs in areas affected by events like wildfires, drought or deforestation. NFF only plants native, ecologically appropriate trees and targets support to areas that need the most help.

"We are excited to partner with NAR to expand our tree planting efforts," said Mary Mitsos, President and CEO at the NFF. "The future of our national forests depends on partnerships like this one to sustain natural ecosystems, foster resilient forests and promote healthy communities. Each contributing dollar means one more tree planted to help to mitigate wildfires, offset carbon footprint, combat climate change and maintain 193 million acres of National Forests. We''re grateful to NAR for engaging with us on this critical initiative and look forward to what we can accomplish by 2025."

The agreement articulates a partnership between NAR and the NFF to plant 1,575,000 trees in National Forest locations nationwide. A guaranteed donation of \$1.575 million from NAR will be used to plant at least 1.575 million trees in National Forest lands by the end of 2025.

ECONOMICS OF BUYING A HOME

REAL ESTATE BROKER COMMISSION STRUCTURE BENEFITS BUYERS AND SELLERS ALIKE The current way brokerage services are paid prevents a greater cost burden that would be especially devasting for first-time and low-income buyers.

if buyers had to pay real estate broker commissions directly, it would add **thousands of dollars** to an **already costly transaction.**

The typical American household has an average of **\$8,863** in the bank*.

That's barely more than 50% of the median down payment on a starter home, which is **\$16,100 or 7%** for first-time homebuyers**.

Since most lenders don't allow real estate broker commissions to be financed, every 1% of broker commissions that first-time buyers pay out of pocket would put their home **\$2,300** further out of reach.

*Bankrate inflation-adjusted data from the Federal Reserve 2016 Survet of Consumer Finances

** In 2020, median downpayment was 12% for all buyers, 7% for first-time buyers, (NAR 2020 Profile Home Buyers and Sellers report.) Actual dollar amounts based on national median starter home price in QT of 2020 according to NAR Q1 First-time Homebuyer Affordability index.

City Sign Ordinances

SAN FERNANDO AND SANTA CLARITA VALLEY

Listed below for your reference, are the specific municipal regulations, along with the regulations for L.A. and Ventura Counties that apply in unincorporated areas or those cities without specific municipal codes. SRAR highly advises REALTORS® to check the current laws, and follow these best practices as they will help preserve our rights as REALTORS® to use temporary signs:

1. Only post temporary signs (directional or open house) when you have an open house.

2. Always observe time and placement restrictions for signage.

3. Always obtain a property owner's permission before placing a temporary sign on someone's property whether their property is residential or commercial.

4. Never place temporary signs in the medians or rights of way - meaning along the streets or sidewalk and observe Americans with Disabilities Act regulations.

5. Decrease visual clutter by "piggy backing" off of other directional signs, placing your directional signs only when your directions divert from other directions.

The following are the regulations from each municipality in areas where our members frequently work:

<u>Agoura Hills:</u>

For Sale - 1 sign per unit, shall not exceed 6 square ft. in area and 6 ft. in height

Open House/Directional - Maximum of 4 signs, size may not exceed 3 square ft. in area or 4 ft. in height
